

Kogelberg Nature Reserve

The dazzling eco-cabins at Kogelberg Nature Reserve, overlooking fynbos and blooming plant-life like no other.

Kogelberg Nature Reserve's Oudebosch and Mbali Collection cabins have garnered international and local awards for the sustainable design ethos employed. Green features include waterless, composting toilets; passive cooling design; sustainable and local building materials for the lightweight structures and photovoltaic power generation. The popular eco-pools contain no chemicals, instead water from the Palmiet River is filtered through local and endemic plant material.
