

The Vineyard Hotel

The Vineyard remains unwavering in its dedication to sustainability, manifesting its commitment through various eco-friendly practices. The hotel harnesses renewable energy with 80 solar panels, sourced from the nearby Darling Wind Farm, exemplifying a commitment to clean power generation.

Environmental responsibility extends to waste management, with the impressive recycling of 98 percent of its waste, reducing its ecological footprint significantly. The hotel also employs several water-saving initiatives to ensure efficient and responsible resource use.

In the culinary domain, The Vineyard takes pride in its sustainable and ethically produced cuisine. Guests can savor the delectable offerings while basking in the serene ambiance of the garden lounge and patio, making it an ideal spot for indulging in a delightful afternoon tea, served daily. These conscientious efforts underscore the hotel's dedication to both exceptional guest experiences and environmental stewardship.
